Jennifer Yong

Consultant, iGroup / Innovative Education Services

FUNDAMENTALS OF THOUGHT

Part 1 : Research Best Practices: To author, to get published and to get cited

A lot of universities are trying to improve their university ranking. As the research is one of the criteria, University's Centre of Excellence had been tasked with important role, to improve the research including research publication. In order to achieve these, a lot of researchers are unsure about the plagiarism such as publishing criteria, and most importantly the intentional and unintentional plagiarism that may affect the brand name of the university. Research being done aside, the development of the researchers are important as well for the publicity and marketing of the research being done by researchers, as it may help the university for corporate and government funding.

Part 2 : EEOWWW

An online authoring platform for professional writing- EEOWWW designed to streamline the professional writing process by integrating major aspects of authoring workflow, it helps authors to collect data, manage references, format manuscript, explore similar ideas, and collaborate with others. All done in one place, anywhere, anytime, on any devices.

Part 3: Emerging Technologies: Helping to increase competency skills through blended learning
