means that if miscellaneous official regional real income value ascends up to Rp.1, then regional real income value will also ascend up to Rp. 1.778.

CONCLUSION

Based on data analysis of calculated F-value, regional tax, regional retribution, self-governing regional wealth yield, and miscellaneous official regional real income were statistically showing simultaneous effect on regional real income.

Refer to data analysis of calculated t-value, regional tax was partially showing insignificant effect on regional real income. Calculated t-value of regional retribution was partially revealing significant effect on regional real income. Calculated t-value of self-governing regional wealth yield was partially showing insignificant effect on regional real income. Calculated t-value of miscellaneous official regional real income was partially revealing significant effect on regional real income.

structural transformation that is related to the power structure; *third*, actor transformation that includes the change in leadership and the supporters of the leaders; *fourth*, issue transformation concerns with the position of the parties in reaching compromise; and *fifth*, personal transformation of hearts and minds of individual leaders or decision-makers. Based on the model we can identify which factors and conditions support or hamper the transformation from conflict to reconciliation. This is shown in table 1.

In this paper the five issues as stated in Miall's model will be applied in order to explain why the peace agreement in 2005 was successful. The analysis will begin with actor transformation, followed by structure, issues, personal, context factors, and social reconciliation.

2. Actor Transformation

The conflict transformation of conflict in Aceh must be seen in the changing context of the actors' perceptions and positions in interpreting the conflict. The turning point is the change of presidency in 2004 from Megawati to Yudhoyono. At that time the Megawati presidency had weakened GAM but Yudhoyono changed the strategy from a military solution to a political one. Yudhoyono's decision was supported by the military (the Indonesian Armed Forces or TNI), particularly its commander, General Endriartono Sutarto, who summoned 100 senior military officers and told them that "whomsoever in [the] TNI [Indonesian Armed Forces] who tried to stir up trouble over

PERSOALAN AUTO PLAGIAT DAN PLAGIAT MASIH SERING DITEMUKAN

Self-Plagiarism is defined as a type of plagiarism in which the writer republishes a work in its entirety or reuses portions of a previously written text while authoring a new work.

The American Psychological Association (2010) explains how plagiarism differs from self-plagiarism:

“Whereas **plagiarism** refers to the practice of claiming credit for the words, ideas, and concepts of others, **self-plagiarism** refers to the practice of presenting one’s own previously published work as though it were new” (pg. 170).

SALAH SATU CONTOH

How to perform due diligence before submitting to a journal or publisher.

- **Check that the publisher provides full, verifiable contact information, including address, on the journal site. Be cautious of those that provide only web contact forms.**
- **Check that a journal's editorial board lists recognized experts with full affiliations. Contact some of them and ask about their experience with the journal or publisher.**
- **Check that the journal prominently displays its policy for author fees.**
- **Be wary of e-mail invitations to submit to journals or to become editorial board members.**
- **Read some of the journal's published articles and assess their quality. Contact past authors to ask about their experience.**
- **Check that a journal's peer-review process is clearly described and try to confirm that a claimed impact factor is correct.**
- **Find out whether the journal is a member of an industry association that vets its members, such as the Directory of Open Access Journals (www.doaj.org) or the Open Access Scholarly Publishers Association (www.oaspa.org).**
- **Use common sense, as you would when shopping online: if something looks fishy, proceed with caution. D.B.**
