Diu Seng See , Ph.D
SOLUTION CONSULTANT
CLARIVATE ANALYTICS

As Solution Consultant specializing in Scientific & Scholarly Research, See Diu Seng represents Clarivate Analytics as speaker at key conferences across Southeast Asia to share best practices in scientific discovery and research evaluation.

As the regional lead consultant, Diu Seng provides decision support services and conducts training workshops for Clarivate customers in academia and research. He has also been actively involved in identifying top researchers in numerous regional awards such as the Malaysian Researcher Star Awards, Thailand Frontier Researcher Awards, etc.

Prior to joining Clarivate, Diu Seng was a postdoctoral researcher at the National University of Singapore (NUS) from 2013 to 2015. During that time, he was Business Lead at Singapore-based LuminiCell Pte Ltd where he raised SGD 250,000 seed funding to develop unique fluorescent technology. He has also been teaching during his spare time for more than 10 years.

FUNDAMENTALS OF THOUGHT

What if you could uncover new connections in research with guaranteed quality, impact, and neutrality?

Research data is booming. The opportunity to reveal meaningful linkages – between past and current research, between collaborators, between funding and research impact – is huge, as long as you start with the right data.

With the Web of Science platform, you can access an unrivalled breadth of world-class research literature linked to a rigorously selected core of journals and uniquely discover new information through meticulously captured metadata and citation connections. The Web of Science platform connects the Web of Science Core Collection to regional citation indexes, patent data, specialized subject indexes, and an index of research data sets, all in all totaling over 33,000 journals, meaning you have the breadth you need to be truly comprehensive in your search. Find out what makes Web of Science Core Collection the most accurate, objective, and complete resource available.
